## NOTICE TO RESIDENTS BELANGER RECONSTRUCTION

This letter is to advise you that Hardrock Concrete is scheduled to begin Stage 2 of the Belanger Road Reconstruction Project on Tuesday, June 7, 2016. Stage two will be the north half of the road from 27171 Belanger to Chestnut Street. All residents in Stage 2 must have their vehicles out of their driveway by 7:00 am on Tuesday, June 7<sup>th</sup>, 2016

There will be limited parking on Belanger in Stage 1 until the contractor completes the approaches. The contractor plans to form the approaches on June 7 and pour the concrete on June 8. Please do not park right up to approaches in Stage 1 until after the approaches have been poured to leave room for construction vehicles. Residents in Stage 1 are not to drive on the approaches until the contractor removes the barricades which will be a minimum of 5 to 7 days for proper curing of the new concrete.

Residents on Belanger may park on adjoining side streets. There will be **no parking on the west side of Belanger** throughout the construction to maintain access to the hydrants and passage of emergency vehicles.

Approaches replaced as part of this project are at no cost to property owners. Service walks between the street and sidewalk will be eliminated during the paving project. Should any sidewalk **require** replacement during this project it will be at no cost to property owner.

The mail service will be not be interrupted by the construction.

Trash pick up will be handled by the contractor. Please place your trash out as usual at the end of your drive (after 6:00 PM the previous evening or by 7:00 AM on the day of pick up) and it will be taken to the nearest available location for pick up. We ask that you mark your address in **bold letters** on your trash and recycling carts to assist in the return. If possible, please use brown kraft bags for grass clippings rather than cans.

Please remove any landscaping installed in the City right-of-way. Mark sprinkler heads located in the City right-of-way as MISS DIG does not have a record of these and if marked there will be less chance of damage. During the removal of sidewalk, approaches and the street anything in the right-of-way will also be removed and discarded.

At this time, we would like to apologize for any inconvenience. We thank you for your patience and cooperation during this project. If you have any questions please contact the City of Roseville Engineering Department at (586) 445-5445.
